Subject: Request for Review of Draft "Advancing the Next Generation of Risk Assessment Report"
Attachments: NexGen Report 062013.docx

Dear Coauthor, Contributors, and Governmental Partners:

After several years of work, I'm very pleased to share the draft report entitled "Advancing the Next Generation of Risk Assessment". I am sending you this email to ask for your review of the draft report, and to ask for your help in ensuring that the document reflects the best ideas concerning the incorporation of new molecular, computational and systems biology into risk assessment. This will be the first time many of you have seen the draft document in its entirety.

The intended audience for the document includes risk assessors, risk managers and the public, hence, we are attempting to keep the document relatively short and understandable to those who are not molecular or computational biologists. Its about 90 pages plus front matter and references. The document also serves as a guide to a number of technical papers, including a set of papers that form the basis for the report. There will be a ~ 3 week review period (due back to me July 11). A conference call will be set up ~1 week after you receive the document to address any questions you may have. It has not yet had a final technical edit so it may be rough in spots.

Following this comment period, the document will be revised, peer-reviewed, and, then, released to the public in the fall. The final document is intended to serve as the basis for further discussion among the risk assessment community and stakeholder about this emerging field.

Thank you for your consideration and efforts.

PS Let me know if I left anyone off the address list inadvertently.
